![AIDKA - AUSTRALIAN INDEPENDENT DIRT KART ASSOCIATION INC.]

CHANGES TO THE AIDKA APP NOMINATIONS PROCESS
FUEL, OIL & RATIO FIELDS

Please note that effective **Wednesday 14ᵗʰ February 2024**, Fuel, Oil and Ratio fields have been added to the AIDKA nomination process. This is a mandatory field required for each class at the time of nominating for every AIDKA event.

The capturing of this data is to assist with the following:
1. Providing data for the fuel tester. Remember testing can occur at any AIDKA Event.
2. Providing data on what fuel & oils are being used for the maintenance of the permitted Fuel & Oils Listing (as per Rule 24.2 of the 2024 AIDKA Rule Book)

The nominations screen now looks like the following (right hand side):
- The Fuel Type is a drop-down menu with the permitted Fuels available to select from;
- The Oil Type is also a drop-down menu with the permitted Oils available to select from;
- The Fuel/Ratio field is a free text field. An example on how to enter your data is 20:1

This information MUST be entered for every competitor, and every class. Please ensure the data is accurate.

If you have any questions regarding the above, please contact your Club Secretary.
